

## PRESS RELEASE

### All Things AI and Beyond Featured at the Linley Spring Processor Conference

**MOUNTAIN VIEW, CA – April 6, 2021** – The Linley Group announced that its Spring Processor Conference will be held the week of April 19 through 23, 2021, and will feature live-streamed presentations addressing processors and IP cores for AI applications, embedded solutions, data centers, automotive, and edge designs.

As participants have come to expect from past Linley events, the spring 2021 conference will feature high-quality technical content that attendees from around the globe will be able to participate in via live-stream. Participants will be able to view live presentations as well as interact with the speakers during Q&A and breakout sessions daily from 8:30am – 12:40pm Pacific Daylight Time (11:30am – 3:40pm EDT). The program will feature talks and panel discussions covering a broad range of topics such as:

- AI in the Data Center
- AI at the Edge
- AI Software
- SoC Design
- Embedded Processors and IP
- Sensor and Signal Processing
- AI in Automotive
- 5G and Network Infrastructure

#### Featured Keynote:

Linley Gwennap, principal analyst, The Linley Group, will open the conference with a presentation of the latest trends in AI silicon as the technology moves from data centers to the edge.

"AI has generated an explosion of silicon-architecture diversity, as evidenced by our Linley Spring Processor Conference program. Our biggest spring program yet will include new technology disclosures and product announcements from both startups and established semiconductor and IP vendors," said Bob Wheeler, principal analyst and conference chairperson. "Following the success of our 2020 virtual conferences, which achieved record attendance, we are excited to once again be sharing these presentations with a global audience via our live-streamed format."

Sponsoring companies include Intel, Flex Logix, Arm, GlobalFoundries, Synopsys, Expedera, Deep AI Technologies, CEVA, Arteris IP, Movellus, BrainChip, EdgeCortex, Innatera, Rambus, Cerebras, Graphcore, Cadence, Marvell, SiFive, Mythic, SimpleMachines, Tenstorrent, Hailo, and Qualcomm.

The Linley Group offers free admission to qualified registrants who sign up by April 14. For the full conference program, and to register, please visit [Linley Spring Conference 2021](#).

#### About The Linley Group

The Linley Group is the industry's leading source for independent technology analysis of semiconductors for a broad range of applications including AI, networking, communications, data center, and embedded. The company provides strategic consulting services, in-depth analytical reports, and conferences focused on advanced technologies for chip and system design. The Linley Group is the publisher of the noted [Microprocessor Report](#), a weekly publication. For insights on recent industry news, subscribe to the company's free email newsletter: [Linley Newsletter](#).
